

Delta Sharing to Excel

The Exponam.Connect™ Excel Add-in brings Delta data directly to Excel

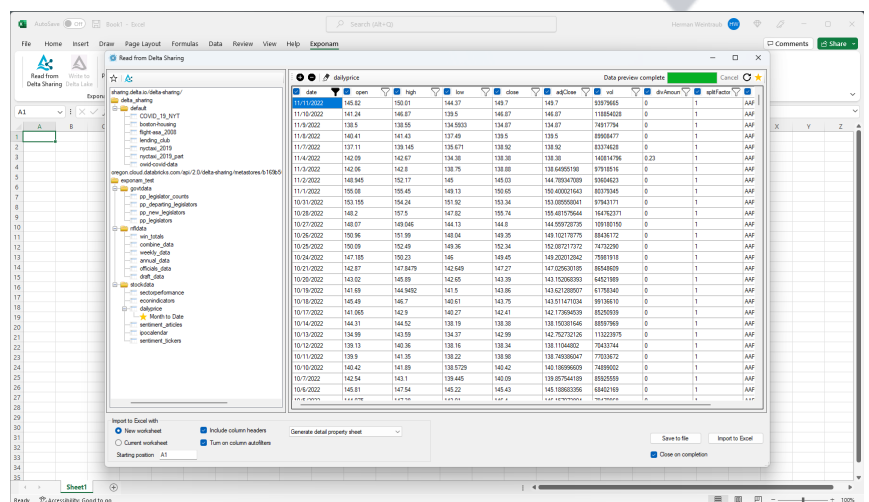

Big data is not just for data professionals. Cloud data is not just for engineers and technologists. **BIG DATA IS FOR EVERYONE.** With the Exponam.Connect Excel Add-in, business users and analysts can work with Delta data directly in Excel.

It's Easy:

- If a user can create a filter in Excel, they can work with billions of rows of Delta Lake data
- Business users work with data where they want it, in Excel. No new applications to install or learn
- There is no complicated set-up. No ODBC connections or configurations
- Delta Sharing Tables appear in the table view – Just select a table and start working
- Users can also save millions of rows to a secure file for easy sharing, distribution, and archive

It's Powerful:

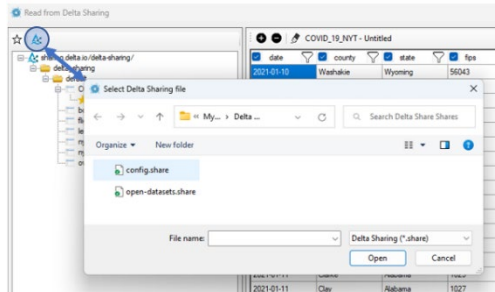

- Create filters to easily pull down the current day's (or week's or month's) data
- Save filters and re-use them whenever needed
- All the Excel functions users love → v-lookups, pivot tables, charts
- Unlock the power of internal and marketplace cloud data

Easy filtering and dynamic ranges

The Exponam.Connect Excel Add-in is now in limited initial release. To become a part of the limited release and receive AWS re:Invent 2022 preferred pricing, come see us at the Databricks Booth in the Venetian Expo Hall or contact us at info@exponam.com

Exponam creates better ways to share, move, store, and explore data. Organizations can use Exponam.Connect Add-ins and .BIG files with their existing technology architecture, to make large and sensitive data easier to access, faster to share, and cheaper to store.

Exponam .BIG Files

.BIG files are super-efficient for **interchanging and moving data**. Time to egress and ingest large data sets is slashed from hours to minutes. .BIG files are highly compressed (1/30th the size of other data files) enabling fast distribution and efficient storage.

.BIG files are completely **tamper-proof**, their provenance is guaranteed, and lineage is maintained. You can be confident that the publisher is genuine, the file properties are accurate, and the data is unaltered.

Distribution to users is easy and secure. .BIG files of any size (hundreds of millions of rows) are explored in the Exponam Explorer™, a **spreadsheet viewer**. Instantly filter, sort, and find data without ever migrating the content. Desired data is moved to Excel with a single click.

Access data directly within MS Excel with the Exponam.Connect Add-in. System integrations include .Net and Java API, Command line interfaces, and JDBC.

.BIG files are fully encrypted, ensuring that data is **completely secure** anywhere it resides, at rest, in use, and in transit. Access is controlled via passphrase or public key authentication.
